Strategy

- Long term «fundamental» positioning strongly focused on investment grade bond area coupled with opportunistic trading approach
- Efficient management of excess cash (ECB deposits) / Low Duration level
- Use of enhancing and hedging strategies coupled with both risk and expected credit loss control
- Low cumulative RWA level and relevant ECB / funding eligibility
- Stable and cross-year recurrent sources of revenues in a low risk investment framework

2.3 Focus on DTA

Focus on DTA regulatory implications

Convertible DTAs

- DTAs related to write downs of loans convertible into tax credits (under Law 214/2011)
- Their recovery is certain regardless of the presence of future taxable income and is defined by fiscal law (range ca. 5%-12% per annum, with full release by 2026)
- No time and amount limit in the utilization of converted DTAs
- Capital requirements: 100% weight on RWA

Data in €/mln

205.4

DTAs due to tax losses (non - convertible)

- DTAs on losses carried forward (non-convertible) and DTAs on ACE (Allowance for Corporate Equity) deductions can be recovered in subsequent years only if there is positive taxable income
- No time limit to the use of fiscal losses against taxable income of subsequent years
- Capital requirements: 100% deduction from CET1

25.3

Other non-convertible DTAs

- DTAs generated due to negative valuation reserves and provisions for risks and charges (~€39.4*mln as of 31 Dec 2021)
- Capital requirements: deduction from CET1 or weighted in RWA depending on certain thresholds**. For Banca Ifis they would be weighted at 250% but they are partially offset by DTL (~€23.9mln as of 31 Dec 2021)

15.5

*Includes prudentially €5.3mln of DTAs related to Ifis Rental and Ifis Real Estate not included in the Banking Group as not a regulated entity

** As stated by CRR (article 48), these kind of DTAs are subjected to a double threshold mechanism: if their amount is less than 10% of the CET1 Capital, they are weighted at 250%; if their amount added to the total³¹ investments in financial sector subjects is less than 17.65% they are weighted. If the amount of DTAs is greater than or the first or the second threshold, the amount in excess is deducted from CET1 Capital.

2.4 Focus on PPA

- In 2016, following the acquisition of former Interbanca, Banca Ifis valued the performing and non performing loans of Interbanca by applying a market discount and a liquidity discount to reflect purchase price
- The purchase price allocation (PPA) is written back with the progressive maturity/the disposal of Interbanca's loans

As at 31 Dec 21, the residual amount of pre-tax PPA was €33m
