

Breakdown of energy consumption by source (Gj) *

	2021	2020	2019
Natural gas consumption for central heating	5,106	4,522	6,005
Gasoline consumption for the vehicle fleet	385**	191**	-
Diesel consumption for the vehicle fleet	14,716	12,915	21,903
Total fuel consumption	20,207	17,627	27,908
Consumption of purchased electricity (non-renewable)	-	-	13,433
Consumption of purchased electricity (renewable)	10,101	11,273	-
Consumption of energy from solar panels (renewable)	370	362	450
Total electricity consumption	10,471	11,635	13,882
Total	30,678	29,261	41,791

* See the section on “Notes for the collection and calculation of energy consumption data [GRI 302-1]” at the end of the chapter

** The presence of consumption for petrol-driven cars is due to the preferential use of proprietary vehicles with respect to public transport services in the context of the COVID-19 health emergency.
